

Lengthening the Drogue Kill Line

We lengthen the kill line of the drogue when long trap door effect is encounter on continuous jumps

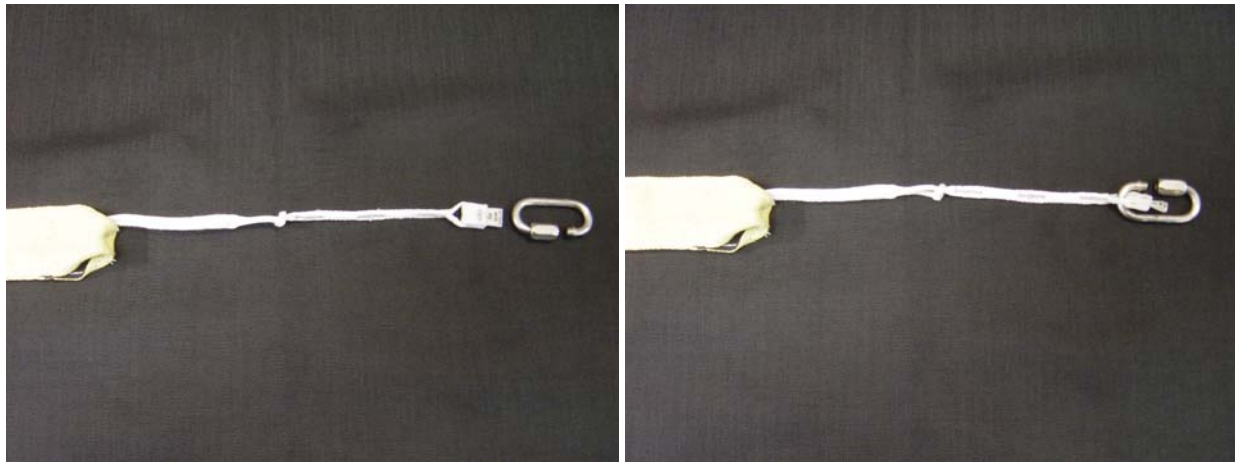

Materials:

1 main s-link

Instructions:

First Extract the kill line out of the bottom of the drogue bridle, remove the Link #5 and larkshead the slink to the end of the kill line
Note: make sure the slink tab is to the bottom of the kill line

After you larks head the slink to the kill line feed the kill line back into the bridle then install the link #5 to the bridle and the Slink.

If you have any questions please contact the UUPT Rigging Loft.
